

AH 7-STAR CARE

REGENERATIVE PRINCIPLES

Our pioneering and innovative treatment methods are regenerative, not cosmetic, delivering enduring, natural-looking results. We achieve this by stimulating the body's natural powers of regeneration and repair, and slowing underlying causes of degeneration. Regeneration is a journey, more than a destination, and we help keep you travelling in the right direction by training your tissues into optimal health, to regain and maintain your healthy glow.

DETAILED DIAGNOSTICS

Our unique diagnostic process underpins treatment assessment and delivery during your regenerative journey. From your Comprehensive Consultation and Signature Examination, throughout your AH experience, we methodically examine the multilayer structure and health of your tissues, in order to accurately prescribe treatment to fit your needs. In addition to traditional examination, our augmented methods may include scientific measurements, medical photography and ultrasound visualisation.

MULTIDIMENSIONAL PRESCRIPTIONS

Dynamic treatment prescriptions holistically address individual needs and concerns, with an integrated whole-person approach. Treatments and advice are prescribed in ideal combinations to enhance their regenerative effects, with a patient's underlying health and lifestyle factored into their individual plan, thus addressing your health inside and out.

INTEGRATED TEAM CARE

This crucial standard ensures that patients are receiving the very highest form of actively managed integrated care at every stage. Dr Julia and the clinical team collaborate directly to enable each patient to benefit from our team's combined knowledge and expertise, ensuring seamless continuity and optimised results.

HEIGHTENED CARE CURATION

Aesthetic Health member patients are supported by a personal Care Curator, who coordinates with them directly for a seamless 7-Star Care experience. Appointments and treatments are scheduled according to individual plans, and synergistically sequenced to optimise results and comfort.

SCRUPULOUS CARE STANDARDS

Every day, the team works diligently to ensure every aspect of medical care is of world-class standard and delivered seamlessly. Scrupulous care is part of Aesthetic Health's DNA – we are CQC-rated 'Outstanding', and continually work to supersede our own rigorous standards and our patients' expectations.

METICULOUS CARE DELIVERY

Aesthetic Health is medically meticulous, with exacting attention to all details of care delivery. Every clinical team member involved in patient care has an in-depth understanding of the patient's individual needs, and keeps their prescription and treatments finely tuned, according to their progress and feedback.
